Foreword

Research is a veritable tool for both personal and national development in a University setting and other similar endeavours. Research output is required for the discoveries of new innovations and for academic promotion. A great number of published researches helps in the grading of Universities amongst its peers, unfortunately many of such researches are kept in lockers without dissemination. This compendium of researches conducted and published by academics from the Faculty of Basic Clinical Sciences of the College of Medical Sciences, Ahmadu Bello University is an attempt at highlighting outputs by the academic staff.

Prof Haruna Mohammed Muktar
Dean, FBCS

Preface

This compendium of publications was compiled by the research committee of the Faculty of Basic Clinical Sciences, College of Medical Sciences, Ahmadu Bello University, Zaria. This compilation is a testament of the contribution of academic staff of this faculty to medical knowledge and the growth of the College and University at large. There are four departments in the Faculty namely; Chemical pathology, Haematology, Medical Microbiology and Pathology. The publications have been listed according to departments within the faculty for ease of navigation and referencing. Faculty members' names are in bold fonts. This compendium will be updated every three years.
